

Archive your web content for full visibility into what changed and when

## Why capture web content?

Website archiving is a growing necessity for a wide range of organizations. Whether in response to a litigation event, to comply with regulations or for internal investigations, it is vital to keep an accurate historical record of changes to your website. With Smarsh, you can allow your organization to take full advantage of the power of the web while maintaining an audit trail and staying compliant.

## Key features

Web page time-stamping

Multiple export and download options

Side-by-side web page comparisons

Advanced search

Dynamic website reconstruction

## Secure peace of mind with the compliant capture of entire websites

### Supported channels include:

WWW

Yelp

Zillow

Vimeo

Pinterest

Squarespace

### How it works

Smash offers the most comprehensive web archiving solution available in the market.

Complete websites or individual web pages can be captured in their original format, providing a precise record of what was published online as well as what was changed at any point in time.

### Key benefits:

#### Meet regulatory requirements and resolve internal policies

Capture, archive, supervise and discover all web page to meet FINRA, SEC, FTC and other regulatory requirements and help resolve internal disputes.

#### Improve review effectiveness

Web pages are captured and rendered in your browser with their original look and feel to assist with e-discovery and internal investigations. Interactive elements remain functional, and links between pages are preserved.

#### Maintain accurate historical information

Each archived page is time-stamped and stored, unaltered, in its original format. Web content can be retained for as long as necessary and exported in multiple formats to clarify anything from HR matters to potentially fraudulent claims.

#### Save time with a simple onboarding and user experience

A simple, intuitive UI and set of workflows make leveraging your historical web content fast and effective.
