

ADD COMPLIANCE & E-DISCOVERY TO SHAREFILE WITH THE CONNECTED ARCHIVE FROM SMARSH

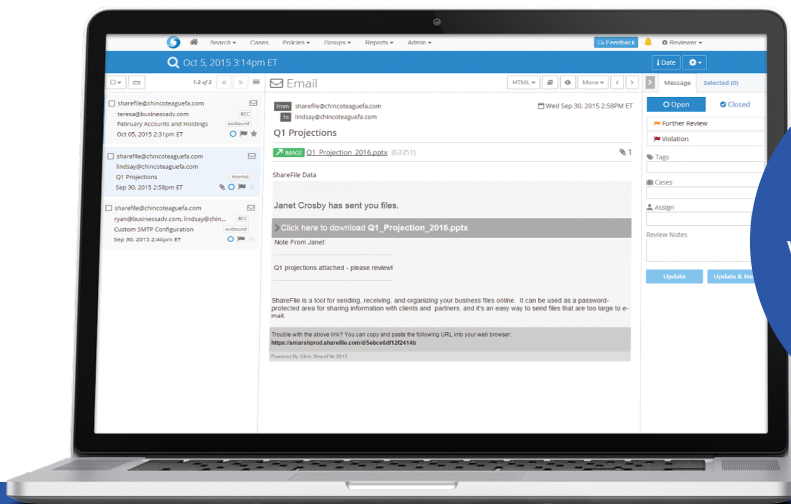

Embrace the collaborative power of ShareFile and rest easy knowing you're managing compliance obligations effectively.

Smash enables organizations to archive and supervise ShareFile communications in support of compliance, e-discovery and record keeping initiatives.

The solution is designed for companies that utilize ShareFile in conjunction with email and need to search, review and produce all email-related data from the Connected Archive.

THE SMARSH ADVANTAGE

- ✓ A single platform for archiving, monitoring and producing all electronic communications including email, social, instant messaging and web content
- ✓ Reduce time for discovery and audit requests
- ✓ Safe, secure and flexible cloud-based solution

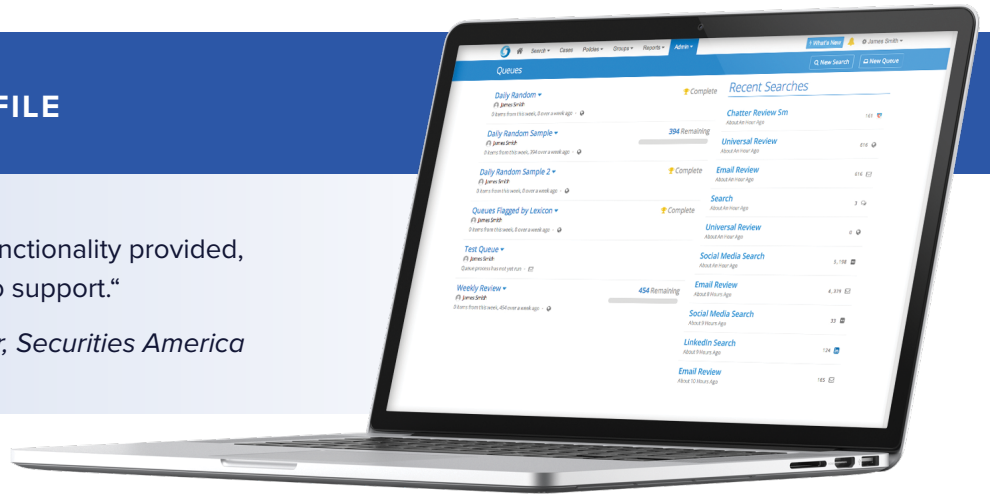

ShareFile attachments are examined by the policy engine along with message contents for heightened supervision of attached content

Contact an account executive to learn how we can help you enable ShareFile within your organization at www.smarsh.com/sharefile

ARCHIVING FOR SHAREFILE

“We selected Smarsh for the functionality provided, ease of use and commitment to support.”

~ Chief Information Officer, Securities America

FEATURES

Safe, Secure, ShareFile Archiving

- ✓ Archive all non-encrypted attachments up to 2 GB.
- ✓ Capture an unlimited number of messages.

Fast, Powerful Search

- ✓ Search universally across people, keywords and content types from a single interface.
- ✓ Fully threaded conversation view allows the reviewer to ascertain the full context of the message.

Designed for Supervision and E-Discovery

- ✓ Easily move between messages in your review queue.
- ✓ Escalate and tag content based on cases, events or topics.
- ✓ Automate your policy management.
- ✓ Maintain a full audit trail of all actions taken in the Connected Archive.

Smarsh securely captures and indexes ShareFile attachments, making them available for supervision, e-discovery, and production within the Connected Archive platform.
