

# Professional Archive

The Comprehensive Archiving Solution

## The Challenge

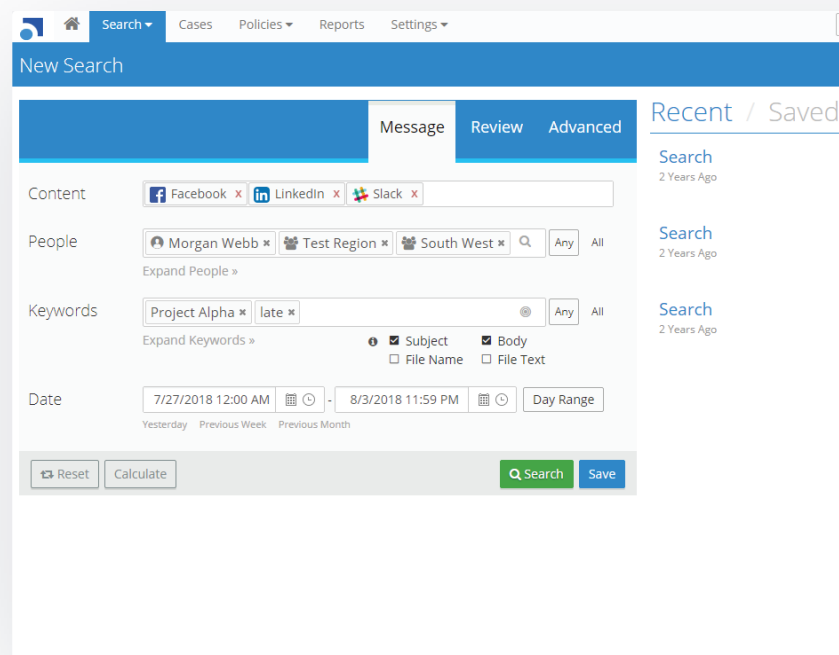

Regulated organizations of all sizes are under the same legal obligation to capture and archive electronic communications. There is a need to get compliance teams up and running quickly, efficiently and on a solution with intuitive workflows and a simple user experience without compromising on platform security, performance or capabilities.

## The Solution

The Smarsh Professional Archive is built to enable fast, streamlined, intuitive communications compliance. Critical information is retained in a single, secure, search-ready repository where it can be actively monitored and produced on-demand. The platform's powerful search capabilities span 80+ communication channels and results are returned within seconds. All communications are retained in their original context for effective review, and the platform's clear user interface and self-service tools make for easy onboarding and proof of compliance to the regulators.

## Key Benefits

- ✓ Support for 80+ communication channels, with full context preservation
- ✓ Compliance-driven data capture, retention & access
- ✓ Powerful search criteria across all archived content
- ✓ Fast, self-service exports with multiple supported formats
- ✓ Rich, intuitive workflows for discovery and supervision
- ✓ Granular policies (both template and customizable)
- ✓ Personal Archive for employees to access their historical email data
- ✓ Simple onboarding and user experience

## Key use cases

- **Meeting compliance requirements** of FINRA, SEC, HIPAA, and other regulatory bodies
- **Addressing legal and HR requirements** for e-discovery and investigations
- **Reporting on data** to gain insights into compliance, data usage and business trends
- **Exporting data out of the platform** simply and easily across multiple formats
- **Providing employees with access** to their own historical email data from any device
- **Controlling users' access to data** and their permissions within the platform
- **Supervising electronic communications** with a workflow designed specifically to meet regulatory obligations
- **Utilizing a single pane of glass** for the capture, archive, supervision and discovery of all electronic communications

With Professional Archive, capture, archive and apps are all included as part of our plans
